Description

Don't let the lead photo fool you... This boat has Mercury XR Sportmaster drives!

The Fountain 38 Lightning Stagger is the final evolution of the pleasure version of this World Champion Offshore and World Record Setting v-bottom legend. With the staggered configuration of the engines, the CG is moved off of the transom AND the drive centers are brought closer together. This allows for a higher overall x-dimension, increasing cruse and top end performance. With the CG off the transom, the balance is also improved for rough water operation.

The top ends were done on the motors at 275 hours, as well as repairs of wet sections of the transom, so this boat is ready to go!

The boat is located just across the US border in Richmond, Canada, so viewing for US customers is not a huge challenge.

There are not a lot of the staggered models out there, so if you're looking for an awesome offshore power boat, with one of the most reliable engine packages every provided by Mercury Racing, this could well be the boat for you.

The cockpit is in great shape, with additional LED lightning throughout.

- Depthsounder
- Radio
- Compass
- Cockpit Speakers

Inside Equipment

- Marine Head

Outside Equipment/Extras

- Swimming Ladder

Manufacturer Provided Description

Fountain Mercury's explosive high-performance Lightning series is the end result of decades of supremacy on the world's race courses. There is no finer example of all-out competition than the 38 Lightning which has won multiple world and national championships on numerous occasions. Reggie Fountain's battle-tested pad keel, notched transom, Positive Lift hull, and staggered engines to move the center of gravity down low where it belongs. Put Mercury's twin 525's through Bravo I XR Drives with short Sport Masters and ITS gimbals and you'll be all over 95 MPH. Or, choose 700's with NXT1 gimbals and #6 uppers and lowers and you'll have a rocket ship exceeding 112 mph.
