Description

If you're looking for a luxury tri-toon, Avalon delivers.

With a spacious deck, and a layout that can accommodate the family for cruising or hanging out at the sandbar.

The tri-toon configuration offers a smooth stable ride, and a wake that is great for skiing or pulling the kids on water-toys.

The interior is in great shape on this boat, and the Suzuki 175 has low hours.

The seller has relocated, and is looking to sell the boat quickly.

The boat is available by appointment, as it is located at a residence.

Manufacturer Information

Avalon is a vertically integrated builder, meaning we make everything—pontoons, framing, furniture, and more—here in our own facility. As a result, we have a much higher degree of control over the production and quality of our products than our competitors, who outsource most of the components.

We work every day with our highly qualified team of experienced welders, furniture makers, assemblers and quality assurance engineers to constantly improve our boats and sustain the incredible level of quality that the Avalon brand is known for. Our expert team is our biggest asset. Everyone here is committed to making sure every piece of every boat down to the smallest detail is perfect.

With that comes the continual integration of new technology. Among some of our newest pieces of cutting-edge technology are: our water jet cutter, which provides a smoother finish and more accurate dimensions; our computer-driven Gerber fabric cutters, which allow for more precise furniture patterns; and electronic saws, which do a better job than ever of cutting aluminum to exact dimensions. When there is new technology on the market, our team is using it.

Our customer service team is exceptional as well. They always work efficiently and politely to ensure every interaction with our company is a good one. In fact, Avalon has won the NMMA CSI Award 10 consecutive years from 2008-2019 for outstanding customer service and has one of the lowest incidences of warranty claim in the industry.

Besides being luxurious and strong, all Avalon Pontoons are certified by the National Marine Manufacturer Association. In order to receive that certification, every Avalon Pontoon boat has either met or exceeded the industry's strictest quality and safety standards. Certified boats also must pass rigorous annual inspections to retain their status. According to U.S. Coast Guard statistics, NMMA Certified boats are much safer than uncertified boats.

At Avalon, we believe that our people are the best in the industry, and because of them, our record of high performance does not surprise us at all. Over 40 years ago, we were already producing the finest U.S.A. manufactured pontoon boats, and it's only gotten better from there.
