Description

Step into the 2500 Hybrid and you'll instantly feel the difference of the most spacious bay boat under 25 feet there is. No more feeling crowded or having to move people out of the way to get around. The unique layout also allows for more storage space than you'll ever need and a 45 gallon insulated fishbox. Plus, with more freeboard height, a notched aft bulkhead, and added cockpit space aft, you can still comfortably fish from the security of the cockpit in big water conditions. And because the 2500 Hybrid is vacuum infused, there's no 25 foot bay boat with a better strength to weight ratio. That's why with all its features and capabilities it still only drafts a true 13.5 inches, runs upwards of 60 mph, and jumps on plane in water too shallow for some flats boats.
