Description

The 2006 Hustler 44 HPX is a bold, visually striking, and luxurious addition to Hustler's fleet, designed to impress with its unique styling and high-end features. It was more of a showpiece and aspirational model than a mass-market choice, appealing to buyers seeking exclusivity and performance in a 44-foot powerboat.

A fully composite epoxy laminate, featuring carbon fiber technology with bi, tri, and quad direction glass for a unitized structure that is solid on the water.

This boat features fresh Sterling rebuilds, rated at 975hp, and will deliver eye watering performance well into the triple digits. Step technology increases the efficiency, and allows the boat to cruise at higher speeds with less RPM, and ultimately less stress on the powertrain.

Only a total of 40-hours on the boat, and less than 4 on the fresh sterling engines. The engines were just checked over by Corretti racing, with all fresh fluids including the drives.

There is a pre-purchase survey available as part of the due diligence process, and the owner is addressing noted issues.

One of the flagship models from Hustler, the 44 HPX has an eye-catching graphic, and will be a focal point on the poker run circuit for the new owner.
